New line new speaker

Maths

Pages 54/55 Comparing angles - (revision) An angle is a measure of turn
Right Angle (90°) Acute angle (less than 90°) Obtuse (between 90° and 180°)

Creative Time

This week the teachers would like you to create a poster on using electricity safely. Use this [website](#) to help you- switched on kids. Your second activity is to find 5 examples of each of the angles you have been learning about in maths in your home. Draw and name the angle.

Please take a photograph of any of your finished work that has been set and send it through the year 4 group email. Remember not to include yourself or your family in the photographs.
